Operating Temperature Range:

+0.0/+70.0 degrees celsius

Features Provided:

Monolithic

Inclosure Material:

Plastic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

1 control

Special Features:

Interfaces with motorola 68000 processor

Terminal Type And Quantity:

40 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
