Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Programmable and burn in, mil-std-883, class b and reliability screening required

Inclosure Configuration:

Dual-in-line

Design Function And Quantity:

1 sequencer

Terminal Type And Quantity:

40 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
