Operating Tempurature Range:
-40.0/+85.0 degrees celsius
Inclosure Configuration:
Dual-in-line
Output Logic Form:
Complementary-metal oxide-semiconductor logic
Special Features:
Operating frequency 25m max; counter, binary, 4bit, count up
Terminal Type And Quantity:
16 wire lead
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Yes - demil/mli
