Operating Temperature Range:

+0.0/+70.0 degrees celsius

Features Provided:

3-state output

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

4 selector, data, multiplexer, two to one line

Terminal Type And Quantity:

16 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
