Operating Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

Pacer dawn

Features Provided:

Programmed

Inclosure Material:

Ceramic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Criticality Code Justification:

Feat

Product Name:

Microcircuit adc card pal high level decoder adc

Special Features:

Esd

Terminal Type And Quantity:

20 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
