**Operating Temperature Range:**

-40.0/+85.0 degrees celsius

**End Application:**

Air conditioner, model ftd-100

**Features Provided:**

Low power and programmable and high performance

**Inclosure Material:**

Plastic

**Inclosure Configuration:**

Dual-in-line

**Output Logic Form:**

Complementary-metal oxide-semiconductor logic

**Design Function And Quantity:**

1 synchronizer, pulse

**Terminal Type And Quantity:**

28 pin

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A458a0
