Operating Temperature Range:

-40.0/+85.0 degrees celsius

End Application:

Air conditioner, model ftd-100

Features Provided:

Low power and programmable and high performance

Inclosure Material:

Plastic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

1 synchronizer, pulse

Terminal Type And Quantity:

28 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A458a0
