**Operating Temperature Range:**

+0.0/+70.0 degrees celsius

**Inclosure Configuration:**

Dual-in-line

**Criticality Code Justification:**

Feat

**Design Function And Quantity:**

4 amplifier, operational, general purpose

**Case Outline Source And Designator:**

D-1 mil-m-38510

**Product Name:**

Operational amplifier, quad jfet input

**Special Features:**

Esd; hci; selected item

**Nuclear Hardness Critical Feature:**

Hardened

**Terminal Type And Quantity:**

14 printed circuit

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A458a0
