Operating Temperature Range:

+0.0/+70.0 degrees celsius

Inclosure Configuration:

Dual-in-line

Criticality Code Justification:

Feat

Design Function And Quantity:

4 amplifier, operational, general purpose

Case Outline Source And Designator:

D-1 mil-m-38510

Product Name:

Operational amplifier, quad jfet input

Special Features:

Esd; hci; selected item

Nuclear Hardness Critical Feature:

Hardened

Terminal Type And Quantity:

14 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
