Operating Tempurature Range:
+0.0/+75.0 degrees celsius
Features Provided:
Wideband and monolithic and w/short circuit protection and high slew rate and tested to mil-std-883
Inclosure Configuration:
Dual-in-line
Design Function And Quantity:
1 amplifier, current
Terminal Type And Quantity:
8 printed circuit
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
