Operating Temperature Range:

+0.0/+75.0 degrees celsius

Features Provided:

Wideband and monolithic and w/short circuit protection and high slew rate and tested to mil-std-883

Inclosure Configuration:

Dual-in-line

Design Function And Quantity:

1 amplifier, current

Terminal Type And Quantity:

8 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
