Maximum Power Dissipation Rating:

149.0 milliwatts

Operating Temperature Range:

-55.0/+125.0 degrees celsius

Inclosure Material:

Silicon

Inclosure Configuration:

Flat pack

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

8 register, shift, parallel out

Terminal Type And Quantity:

14 flat leads

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
