Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Burn in

Inclosure Material:

Plastic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

1 arithmetic logic unit

Product Name:

Octal bus transceiver

Terminal Type And Quantity:

20 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
