Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Monolithic and wideband and high slew rate

Inclosure Configuration:

Dual-in-line

Design Function And Quantity:

1 amplifier, wideband and 1 buffer

Product Name:

Wide band hi slew rate buffer amp

Terminal Type And Quantity:

8 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
