Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Bipolar and high speed and low power and ultraviolet erasable

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Product Name:

Power switched reprogrammable prom

Time Rating Per Characteristic:

35.00 nanoseconds access

Memory Device Type:

Eprom

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
