Operating Temperature Range:

-55.0/+125.0 degrees celsius

Storage Temperature Range:

-55.0/+200.0 degrees celsius

Inclosure Material:

Ceramic

Design Function And Quantity:

1 amplifier, linear

Current Rating Per Characteristic:

100.00 milliamperes forward current, peak total value major

Terminal Surface Treatment:

Solder

Special Features:

Package is referred to as a strip line package

Terminal Type And Quantity:

4 case

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
