**Features Provided:**

Electrostatic sensitive and schottky

**Output Logic Form:**

Transistor-transistor logic

**Criticality Code Justification:**

Cbbl

**Design Function And Quantity:**

1 memory, programmable read only

**Product Name:**

Microcircuit, digital, schottky, ttl, programmed 2048x8 proms

**Special Features:**

Microcode memory program bits 32-39

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A458a0
