Features Provided:

Electrostatic sensitive and schottky

Output Logic Form:

Transistor-transistor logic

Criticality Code Justification:

Cbbl

Design Function And Quantity:

1 memory, programmable read only

Product Name:

Microcircuit, digital, schottky, ttl, programmed 2048x8 proms

Special Features:

Microcode memory program bits 32-39

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
