Operating Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

M1a2 tank

Features Provided:

Electrostatic sensitive

Design Function And Quantity:

2 amplifier, operational, high speed

Product Name:

Microcircuit-dual high power operational amplifier

Nuclear Hardness Critical Feature:

Hardened

Terminal Type And Quantity:

8 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
