Operating Temperature Range:

-55.0/+125.0 degrees celsius

Features Provided:

Burn in, mil-std-883, class b

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Transistor-transistor logic

Design Function And Quantity:

2 driver, power

Terminal Type And Quantity:

8 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
