**Operating Temperature Range:**

-55.0/+125.0 degrees celsius

**End Application:**

Used on m1a2 tank

**Features Provided:**

Electrostatic sensitive

**Inclosure Configuration:**

Axial quad array

**Product Name:**

Microcircuit, 12-bit data acquisition system

**Nuclear Hardness Critical Feature:**

Hardened

**Terminal Type And Quantity:**

52 printed circuit

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A458a0
