| Operating Tempurature Range:             |
|--|
| -55.0/+125.0 degrees celsius             |
| End Application:                         |
| Storage unit                             |
| Inclosure Configuration:                 |
| Can                                      |
| Criticality Code Justification:          |
| Feat                                     |
| Product Name:                            |
| 2.5 voltage reference                    |
| Special Features:                        |
| Glassivation thickness is 4000 angstroms |
| Terminal Type And Quantity:              |
| 3 pin                                    |
| Shelf Life:                              |
| N/a                                      |
| Unit Of Measure:                         |
|  |
| Demilitarization:                        |
| No                                       |
| Fiig:                                    |
| A458a0                                   |
|  |
