| Mandanana Barras Biodination Bathana        |
|---------------------------------------------|
| Maximum Power Dissipation Rating:           |
| 825.0 milliwatts                            |
| Operating Tempurature Range:                |
| -55.0/+125.0 degrees celsius                |
| Storage Tempurature Range:                  |
| -65.0/+150.0 degrees celsius                |
| End Application:                            |
| E-3b/c grp a                                |
| Features Provided:                          |
| Programmed                                  |
| Inclosure Configuration:                    |
| Dual-in-line                                |
| Voltage Rating And Type Per Characteristic: |
| 5.0 volts power source                      |
| Memory Device Type:                         |
| Rom                                         |
| Terminal Type And Quantity:                 |
| 28 printed circuit                          |
| Shelf Life:                                 |
| N/a                                         |
| Unit Of Measure:                            |
|                                             |
| Demilitarization:                           |
| Yes - demil/mli                             |
| Fiig:                                       |
| A458a0                                      |
|                                             |
|                                             |
|                                             |
