Maximum Power Dissipation Rating:

50.0 milliwatts

Operating Temperature Range:

-40.0/+85.0 degrees celsius

End Application:

6625-01-432-6997

Features Provided:

High speed and w/sample and hold

Inclosure Configuration:

Dual-in-line

Design Function And Quantity:

1 converter, analog to digital

Time Rating Per Characteristic:

660.00 nanoseconds conversion

Special Features:

Fabrication = lc2mos, package = soic

Terminal Type And Quantity:

20 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
