Body Outside Diameter:

0.600 inches

Body Height:

0.220 inches

Maximum Power Dissipation Rating:

0.450 watts

Operating Temperature Range:

-55.0/+125.0 degrees celsius

Storage Temperature Range:

-65.0/+150.0 degrees celsius

End Application:

Artu/dmu

Features Provided:

Burn in

Inclosure Configuration:

Can

Output Logic Form:

Transistor-transistor logic

Product Name:

Network, hybrid circuit, splitter/switch lf

Terminal Type And Quantity:

6 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
