Operating Temperature Range:

-40.0/+85.0 degrees celsius

End Application:

Scope shield e/i fscm 23386

Inclosure Material:

Plastic

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

1 follower, voltage unity gain

Product Name:

Quad 2-input and gate

Special Features:

Surface mount

Terminal Type And Quantity:

14 bonding pad

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A458a0
