Operating Temperature Range:

-40.0/+105.0 degrees celsius

Inclosure Material:

Plastic

Output Logic Form:

Bipolar metal-oxide semiconductor

Current Rating Per Characteristic:

2.25 microamperes reverse current, dc absolute

Product Name:

Dual general purpose voltage-feedback operational amplifier

Special Features:

Compensator; rail-to-rail operation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
