Operating Temperature Range:

+0.0/+70.0 degrees celsius

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Product Name:

Microcircuit, digital

Time Rating Per Characteristic:

170.00 nanoseconds af output megawatts

Memory Device Type:

Ram

Terminal Type And Quantity:

28 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
