Operating Temperature Range:

+0.0/+70.0 degrees celsius

End Application:

Ci-13

Features Provided:

Electrostatic sensitive

Inclosure Material:

Plastic

Output Logic Form:

Hi-performance mos

Criticality Code Justification:

Cbbl

Product Name:

Microcircuit octal 3-state noninverting buffer

Terminal Type And Quantity:

20 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A458a0
