Operating Temperature Range:

+0.0/+70.0 degrees celsius

Features Provided:

Asynchronous and semisynchronous and programmable

Inclosure Material:

Plastic

Inclosure Configuration:

Leaded chip carrier

Design Function And Quantity:

2 control, communications and 1 generator, baud rate

Product Name:

Z-bus scc serial communication controller

Special Features:

Optimized for nonmultiplexed bus microprocessors; multiprotocol data peripheral; digital phase locked loop; crystal oscillators; serial to parallel, parallel to serial converter/controller

Terminal Type And Quantity:

44 flat leads

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
