

View Online at <https://aerobasegroup.com/nsn/5962-01-461-6416>

Operating Temperature Range:

-40.0/+85.0 degrees celsius

End Application:

C130/c141

Features Provided:

Compatible cmos and dual positive edge triggered and monolithic and programmable and readable

Inclosure Material:

Plastic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

1 memory, programmable read only

Product Name:

Microcircuit, memory, cmos serial configuration prom monolithic silicon

Special Features:

Esd

Terminal Type And Quantity:

8 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
