**Operating Temperature Range:**

-40.0/+85.0 degrees celsius

**End Application:**

C130/c141

**Features Provided:**

Compatible cmos and dual positive edge triggered and monolithic and programmable and readable

**Inclosure Material:**

Plastic

**Inclosure Configuration:**

Dual-in-line

**Output Logic Form:**

Complementary-metal oxide-semiconductor logic

**Design Function And Quantity:**

1 memory, programmable read only

**Product Name:**

Microcircuit, memory, cmos serial configuration prom monolithic silicon

**Special Features:**

Esd

**Terminal Type And Quantity:**

8 printed circuit

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A458a0
