Operating Temperature Range:

+0.0/+70.0 degrees celsius

Storage Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

Esm door assembly cage 81995

Features Provided:

Bipolar and laser trimmed and low drift and low noise and w/buffered output and w/clock

Inclosure Configuration:

Leaded chip carrier

Design Function And Quantity:

1 converter, analog to digital

Product Name:

Complete 12 bit a/d converter

Terminal Type And Quantity:

28 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
