

View Online at <https://aerobasegroup.com/nsn/5962-01-468-7148>

Operating Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

6625-01-451-8727/oscilloscope, general purpose electronic test equipment

Features Provided:

3-state output and electrostatic sensitive

Inclosure Material:

Plastic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Design Function And Quantity:

1 memory, static ram

Terminal Surface Treatment:

Solder

Product Name:

Microcircuit, digital

Special Features:

Word & bit organization-32k x 8, access time-70 ns

Terminal Type And Quantity:

28 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
