Operating Temperature Range:

-40.0/+85.0 degrees celsius

Storage Temperature Range:

-55.0/+150.0 degrees celsius

End Application:

5895-01-127-8134

Memory Device Type:

Programmable

Special Features:

Hmos high density n-channel, silicon-gate 8-bit microprocessor unit; 1 16 bit index registers; 2 16 bit indesable stack pointers; 2 8 bit accumulators can be concatenated to form 1 16 bit accumulator

Terminal Type And Quantity:

40 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
