Body Length:

0.080 inches

Body Width:

0.054 inches

Operating Temperature Range:

+00.0/+70.0 degrees celsius

End Application:

Intercommunication set

Inclosure Configuration:

Dual-in-line

Product Name:

Low-power, slew-rate-limited transceiver

Special Features:

Transistor count is 248; substrate connected to gnd

Terminal Type And Quantity:

8 beam lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
