End Application:

5895-01-461-9786

Component Function Relationship:

Matched

Output Logic Form:

Integrated-integrated-injection logic all memory

Input Circuit Pattern:

20 input all memory

Memory Device Type:

Programmable err-100 err-100

Special Features:

Dimension per ansi y14.5m-1982; workmanship per mil-std 45, reqt 9; solder requirement per mil-std 2000, para 5; identify per mil-std-454, reqt 67, using a tag, label or similar method

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
