Storage Temperature Range:

-65.0/+150.0 degrees celsius

End Application:

F/a-18 e/f hornet aircraft

Features Provided:

Electrostatic sensitive and monolithic and high speed

Inclosure Configuration:

Dual-in-line

Terminal Surface Treatment:

Solder

Product Name:

Microcircuit, digital, high-speed, complex programmable logic device, monolithic silicon

Special Features:

Altered item/made from 176305-02

Terminal Type And Quantity:

24 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
