| Operating Tempurature Range:                |
|---|
| -55.0/+125.0 degrees celsius                |
| Storage Tempurature Range:                  |
| -65.0/+150.0 degrees celsius                |
| End Application:                            |
| Nimitz class cvn                            |
| Inclosure Material:                         |
| Ceramic                                     |
| Inclosure Configuration:                    |
| Dual-in-line                                |
| Output Logic Form:                          |
| Transistor-transistor logic                 |
| Design Function And Quantity:               |
| 4 transceiver                               |
| Terminal Surface Treatment:                 |
| Solder                                      |
| Product Name:                               |
| Quadruple bus transceivers                  |
| Voltage Rating And Type Per Characteristic: |
| 7.0 volts input                             |
| Terminal Type And Quantity:                 |
| 14 printed circuit                          |
| Shelf Life:                                 |
| N/a   |
| Unit Of Measure:                            |
|   |
| Demilitarization:                           |
| Yes - demil/mli                             |
| Fiig:                                       |
| A458a0                                      |
