Operating Temperature Range:

-55.0/+125.0 degrees celsius

End Application:

Av-8b ii (plus) aircraft

Features Provided:

Programmable

Inclosure Material:

Ceramic

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Bipolar metal-oxide semiconductor

Product Name:

Programmed prom digital microcircuit

Terminal Type And Quantity:

20 printed circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
