Special Features:

Wide input voltage range: 3v to 60v; low quiescent current: 6ma; internal 5a switch (2.5a for lt1171, 1.25a for lt1172); shutdown mode draws only 50ua supply current; very few external parts required; self-protected against overloads; operates in nearly all switching topologies; flyback-regulated mode has fully floating outputs; comes in standard 5-pin packages; lt1172 available in 8-pin minidip and surface mount packages; can be externally synchronized

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
