Product Name:

EI2140c and 2141 c, 150 mhz differential twisted pair driver

Special Features:

Applications, twisted pair driver, differential line driver, vga over twisted pair, adsl and hdsl driver, single ended to differential amplification and transmission of analog signals in a noisy environment; temperature range, negative 40 degrees c to positive 85 degrees c; package, 8-pin soic; features, fully differential inputs, outputs, and feedback, differential input range of positive and negative 2.3v, 150 mhz 3 db bandwidth and low power-11 ma typical supply current

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A458a0
