| End Application: |
|--|
| Microcircuit, linear |
| Product Name: |
| 3v enhanced cmos quad differential line receiver |
| Special Features: |
| Low-power cmose design (30 mw typical); interoperable with existing 5v rs-422 networks; industrial and military temperature range; |
| conforms to tia/eia-422-b (rs-422) and itu-t v.11 recommendation; 3.3v operation; receiver open input failsafe feature |
| Supplementary Features: |
| Pin compatible with ds26c32at; 32 mhz toggle frequency; avaible in soic and cerpack packaging; standard microcircuit drawing (smd |
| 5962-9858 |
| Shelf Life: |
| N/a |
| Unit Of Measure: |
| |
| Demilitarization: |
| Yes - demil/mli |
