End Application:

Microcircuit, linear

Product Name:

Lmc7101/lmc7101q, tiny low power operational amplifier rail-to-rail input and output

Special Features:

Guaranteed specs at 2.7v, 3v, 5v, 15v designs; typical supply current 0.5ma at 5v; typical total harmonic distortion of 0.01% at 5v; 1.0 mhz gain-bandwidth; similar to popular lmc6482/lmc6484; rail-to-rail input and output

Supplementary Features:

Mobile communications; notebooks and pda; battery powered products; sensor interface

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
