Digital Microcircuit - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5962-01-578-3468

Product Name:

3.3 volt micromonitor chip

Special Features:

Halts and restarts an out-ofcontrol microprocesor; holds microprocessor in check during power transients; automatically restarts microprocessor after power failure; monitors pushbutton for external override

Supplementary Features:

Accurate 10% or 20% microprocessor power monitoring; eliminates need for discrete components; 20% tolerance for use with 3.0-volt systems; pin-compatible with the ds1232; low cost 8-pin soic, and space saving micro-sop packages available; industrial temperature range of -40deg c to +85deg c
