**Operating Temperature Range:**

-40.0/+85.0 degrees celsius

**End Application:**

Synchronous step-down dc/dc controller

**Product Name:**

Microcircuit, digital

**Special Features:**

Uyp to 85% efficiency; synchronizable up to 750 khz; selectable burst mode operation; soft-start; cellular telephones; rf pa supplies; portable instruments; wireless modems; distributed power systems; notebook and palm top computers, pda's; single and dual cell lithium-ion powered devices

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A458a0
