Body Length:

3.500 inches

Features Provided:

High speed and low power

Inclosure Material:

Silicon

Inclosure Configuration:

Dual-in-line

Output Logic Form:

Complementary-metal oxide-semiconductor logic

Product Name:

32768-word x 8 bit high speed cmos static ram

Time Rating Per Characteristic:

70.00 nanoseconds read-write cycle

Memory Device Type:

Ram

Terminal Type And Quantity:

28 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
