Overall Length:

0.115 inches

Overall Height:

0.040 inches

Overall Width:

0.112 inches

Design Function And Quantity:

1 amplifier, general purpose

Special Features:

1.7 ghz, ultra low distortion, wideband op amp; 750 mhz bandwidth; 10-bit distortion levels through 600 mhz

Supplementary Features:

Supply current: 12.5 ma; output current: 80 ma; 8-pin soic; maximum junction temp: 150 degrees c; storage temp: -65 to +150 degrees c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A458a0
