|---|
| Body Length:                                    |
| Between 0.740 inches and 0.780 inches           |
| Body Width:                                     |
| Between 0.240 inches and 0.260 inches           |
| Body Height:                                    |
| Between 0.125 inches and 0.180 inches           |
| Operating Tempurature Range:                    |
| -40.0 to 85.0 degrees celsius                   |
| Storage Tempurature Range:                      |
| -65.0 to 150.0 degrees celsius                  |
| End Application:                                |
| 4920-01-495-9100                                |
| Inclosure Material:                             |
| Plastic   |
| Inclosure Configuration:                        |
| Dual-in-line                                    |
| Design Function And Quantity:                   |
| 1 multiplexer, digital                          |
| Product Name:                                   |
| Microcircuit, 8-input multiplexer               |
| Voltage Rating And Type Per Characteristic:     |
| 0.5 volts input and 7.0 volts input             |
| Terminal Type And Quantity:                     |
| 16 pin  |
| Shelf Life:                                     |
| N/a   |
| Unit Of Measure:                                |
|   |
| Demilitarization:                               |
| Yes - demil/mli                                 |
| Fiig:   |
