Product Name:

Hex buffer/driver with open-drain outputs

Special Features:

Operates from 1.65 v to 5 v; inputs and open-drain outputs accept voltages up to 5.5v, max tpd of 2.6 ns at 5 v, latch-up performance exceeds 250 ma per jesd 17, parameter measurement information vcc=1.8 v plus or minus 0.15 v

Supplementary Features:

Vcc supply voltage min 1.65 maximum 5.5 unit v, vi input voltage min 0 maximum 5.5 unit v, vo output voltage min 0 maximum 5.5 unit v , ta operating free-air temperature min -40 maximum 85 unit c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A458a0
